2. The non-depolar non-polar end pointer and interrupt the surface of the water. B 15. Lipids such as fatty acids shown here are celulas based as energy storage molms (fats) or cell membranes as structural molms (phospholipid). The coprotins are found in the cells such as enzymes and hemoglobin, as a structural protein of the body (collagen, hair, muscles), or in the blood as part of the fibers of blood coacles.
